

*Southeastern Division of CAPA*

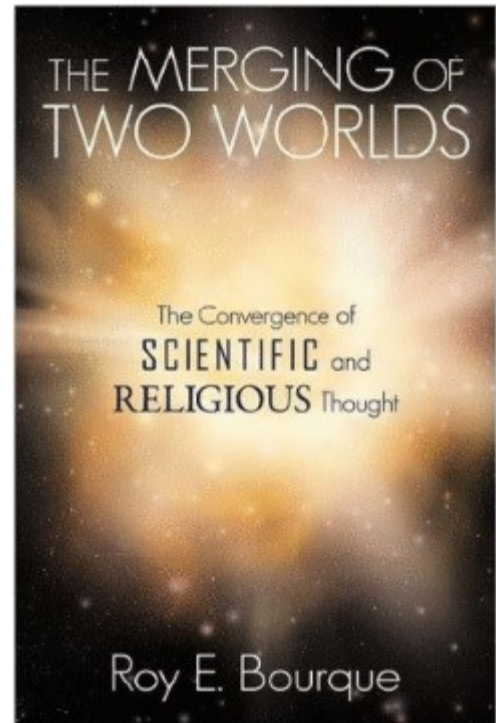

## Author's Page ~ Roy E. Bourque

Roy served six years in the navy's nuclear power program and later retired as the Senior Watch Engineer from Norwich Public Utilities. He has done considerable research on religious history, including bible history, Eastern philosophy and mysticism, mythology, the Mayan calendar, Christianity, and world religions. In addition to his nuclear and electrical background, Roy also conducted research in various scientific studies including evolution, geology, cosmology, and psychology.

Having had spiritual experiences, Roy was able to integrate scientific ideas with religious concepts in unique ways, giving them a new sense of understanding.

### **"The Merging of Two Worlds"**

Science is a left-brained subject. It sees the world in mathematical models. It is all built on logic. Religion is a right-brained subject. It sees the world in associations. It is all built on symbolism. Misconceptions are what prevent us from reconciling the associations with the mathematical models. Once the misconceptions are revealed, the problem goes away. The teachings of Eastern philosophy are interwoven through the Old and New testaments. What they have to say explains a great deal about what the Holy Bible is trying to say to us. It reveals much of the symbolism used in religion so that it can be understood. It takes you beyond the realm of faith and into the realm of knowing.
